

SUSTAINABILITY POLICY

As ANKASAN MAKİNE AŞ., we undertake to voluntarily comply with the following sustainability principles

- Ensuring continuity and environmental security in energy supply by investing in renewable and clean energy.
- To plan and implement our investment decisions and activities with an approach that takes into account their social and environmental impacts.
- To carry out all our activities in a way that respects the environment.
- To monitor carbon footprint data and plan improvement activities to continuously reduce greenhouse gas emissions resulting from our activities.
- To evaluate social responsibility activities as fulfilling their duties and responsibilities towards employees, customers, society and stakeholders, and to implement sustainable and improvable practices.
- To make the sustainability perspective a part of the company culture and to try to raise awareness on this issue among both employees and stakeholders.
- Taking improvement actions to reduce the negative effects by taking into account the economic, environmental and social impacts of all activities.
- To continue our processes based on the protection of human health, support of human development and equality of opportunity.
- To provide an innovative, reliable and accessible business and living environment that will enable human development to be sustainable.
- To evaluate Ankasan Quality Policy, Occupational Health and Safety Policy, Environmental Policy, Human Resources Policy, Equality at Work Declaration and Sustainability principles as a whole, with an integrated management approach.

As the Ankasan family, we accept these issues, which are determined as company policy, as our responsibility and undertake to implement them.
